Claims 3-13 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim should refer to other claims in the alternative only, and --cannot depend from any other multiple dependent claim. See MPEP § 608.01(n). Accordingly, the claims 3-13 have not been further treated on the merits.

Claims 1 and 2 are rejected as failing to define the invention in the manner required by 35 U.S.C. 112, second paragraph.

The claim(s) are narrative in form and replete with indefinite and functional or operational language. The structure which goes to make up the device must be clearly and positively specified. The structure must be organized and correlated in such a manner as to present a complete operative device. The claim(s) must be in one sentence form only. Note the format of the claims in the patent(s) cited.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

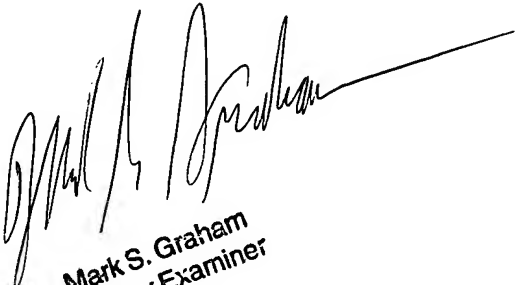

Claims 1 and 2 are rejected under 35 U.S.C. 103(a) as being unpatentable over Davies in view of Miller. As best the claim may be understood Davies discloses the claimed device with the exception of the screw assembly. However, as disclosed by Miller such is known in the art. It would have been obvious to have constructed Davies' cue in the same manner to make it more portable. Regarding the leather tip, the examiner takes official notice that such are commonly known in the art and would obviously have been used on Davies' cue.

Art Unit: 3711

Williams, Mereness, Jr., Merchant, Ransom, and Carlson et al. have been cited for interest because they disclose similar cues.
